

Christmas in Taunton Town Centre 2009

12/12/2009

bright* was delighted to support Taunton in their first large scale Christmas lights switch on event and winter festival.

bright* were chosen by the Taunton Town Centre Management Company to supply technical services to the event including lighting and staging.

The event took place in the daytime and evening and comprised of a range of activities and performances including band, choirs and circus on the main stage in the town centre, and DJs and community workshops on smaller stages in the shopping centres. The event concluded with a fantastic firework show over the town centre set to music.

From the load in at 06:00, **bright*** built a complete stage, lighting system and managed the audio installation. "With events of this nature where time is limited it is essential for careful preparation and management on the day" commented Project Manager Joe Rockett. "we had to co-ordinate the requirements of a large number of different performers on a tight stage schedule".

bright* supplied a mainly LED lighting system for the main stage due to power limitations within the event, plus discharge floodlights and effects lighting to the immediate architecture and iconic buildings that form the town's Parade. The event was extremely well received with attendance well above the expected, with the public and traders agreeing an overwhelming success and a fantastic opportunity to bring the community together and celebrate Taunton and our diverse arts talent.

bright* supplies production services to a wide range of events including concerts, dinners, exhibitions, festival... We supply lighting, sound, staging and effects from our own extensive and contemporary stocks and manage projects nationwide.

For more information on our services or to discuss your event please contact our projects team.
