

NEW PRODUCT

JB Lighting VaryLED Zoom

Ref: G/NEW/010

New to our LED product range; the JB lighting VaryLED A7 Zoom is an automated LED washlight with high efficiency and variable zoom beam angle feature.

The JB Lighting LED A7 Zoom presents an innovation in the field of LED moving head luminaires. It is a bright, lightweight and flexible choice fitting neatly into all sectors of lighting design.

The luminaire features 108 Luxeon high-power LEDs which are packed in a greater density than existing designers to enable a brighter and even distribution of colour and wide colour palette.

The VaryLED A7 Zoom compares with traditional washlight luminaires in the 700W discharge range. The innovative lens system enables a remarkable zoom from 8°-28°, and the shape of the lens system ensures quite operation in all modes.

bright* have introduced a large number of VaryLED A7 Zoom luminaires into stock as a replacement for traditional washlights.

For more information on pricing and availability please contact your account manager.

Optics and light source

- Zoom optics 8°-28° radiation angle, motorised
- Highly efficient lens system
- 108 Luxeon high-power LEDs
(Lifetime approx. 50.000h manufacturers rated)

Effects

- Additive colour mixing
- Optimised colour mixing performance through LEDs packed in higher density
- Smooth electronic dimmer, 0-100%
- Dimming without colour shifting
- Electronic strobe with pulse and random effects

Movement

- High-resolution three-phase stepper motors
- Precise and fast movements
- Extremely quiet, suitable for noise-sensitive applications

Control

- DMX-512
- Prepared for the attachment of a wireless DMX PCB
- Illuminated graphics display, electronically revolvable
- Stand-alone mode

Power consumption

- Max. 300VA, 115V, 230V; 50-60 Hz

Construction

- Compact diecast aluminium housing
- 3-pin and 5-pin XLR connections
- Silent, temperature-controlled additional fans
- Camloc connectors, installation in any position
- Dimensions: 320 x 370 x 200mm
- Weight: 8kg
