

## NEW PRODUCT

# Sennheiser G3 300 Series Radio Microphones

Ref: G/NEW/012

**bright\* is pleased to introduce the latest range of Sennheiser radio microphones to our sound equipment inventory.**

We are now stocking the handheld EW 345, lavalier EW 312 and headworn EW 352 versions to complement our existing large stock of G2 microphone solutions.

The G3 range offers a complete redesign and improvement on an already widely used and highly acclaimed radio microphone family.

The systems boast many new features including:

- Automatic synchronisation between transmitter and receiver
- Increased frequency range
- More user friendly operating menu
- Increased build quality and vocal clarity.

The Sennheiser range of radio microphone systems offer high quality audio in simple and easy to use packages, that can be scaled up and down to suit a wide range of users from the professional stage to education and community.

Systems are supplied individually, or as part of multiple kits and we can tailor systems to suit particular specifications.

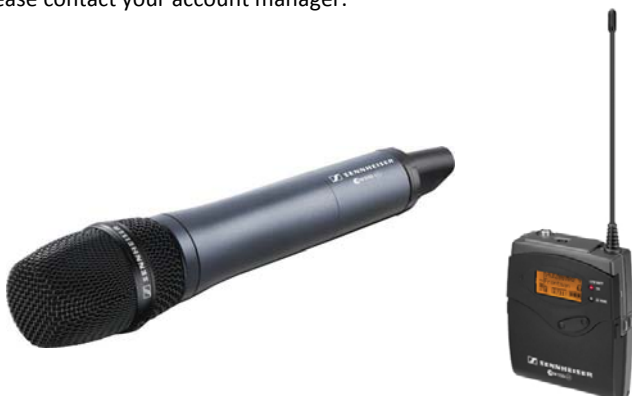

All systems are licensed by JFMG for general hire use, and we can arrange special licensing for particular applications.

We also stock a wide range of additional accessories including antenna distribution systems, AF splitters and a selection of microphone options; handheld, head-worn and lavalier (lapel). Our stocks also include the professional grade MKE2 Gold sub miniature microphone which are suitable for high quality stage and presentation use.

For more information on pricing and availability please contact your account manager.

### 2012 Switchover

Due to increased demand for radio frequencies during the Olympics, changes are occurring to the standard frequencies made available for entertainment use. This may mean that after switch over some older systems may not be capable of tuning to the new frequency range. For more information on how the switchover may affect you please contact your account manager.

### Key details:

- 42 MHz bandwidth: 1680 tuneable UHF frequencies for interference free reception
- Enhanced frequency bank system with up to 24 compatible frequencies
- High-quality true diversity reception
- Pilot tone squelch for eliminating RF interference when transmitter is turned off
- Automatic frequency scan feature searches for available frequencies
- Wireless synchronisation of transmitter and receiver
- Enhanced AF frequency range
- HDX compander for crystal-clear sound
- Increased range for audio sensitivity
- User friendly menu operation
- Illuminated graphic display, receiver shows transmitter settings
- Auto-Lock function avoids accidental changing of settings
- Four step battery indicator with warning shown on receiver
- Easily exchangeable microphones across Evolution wireless range
- Programmable mute button

### Accessory Options:
