

## NEW PRODUCT

# Liteware Uplighter

Ref: G/NEW/013

**New to our LED product range; the Liteware uplighter is a versatile unit designed primarily for the live events sector.**

The stylish enclosure houses a powerful LED system. In stand alone mode the units can be preselected into a range of popular colours that match the Lee and Rosco swatches. In this mode the units can also be set to 20 inbuilt effects and sequences.

The unit boasts a powerful battery that allows it to run for approximately 14hours on full colour after a 6hour charging cycle.

The unit includes onboard DMX control via a wireless receiver, allowing access to the full colour mixing and individual DMX addressing per unit.

Other features include inbuilt aerial, focusable top LED and easy carry grab handle. The units can be supplied individually or in a flightcase of up to six units, with in-built recharging system included.

For more information on pricing and availability please contact your account manager.
